

Environmental Information Sheet

MIRQUAT MAFF/MAPP 11406

For CPA
Office use
only

A 730 g/L soluble concentrate formulation containing chlormequat chloride, a growth regulator for use on winter and spring wheat, winter and spring oats and winter barley, winter rye and ornamental plant production.

Maximum application rate:

Winter wheat, winter barley, spring and winter oats and winter rye 2.3L/ha

Winter wheat 1.6/ha split dose application followed by 0.65L/ha

Spring wheat 1.1L/ha

Section	Profile
<p>1. WILDLIFE</p> <p>Mammals and Birds</p>	<p>Mirquat is not classified as '<i>Harmful to game and wildlife</i>'</p> <p>No risk management is necessary to protect wild mammals and birds. Chlormequat chloride, the active ingredient in Mirquat is of moderate toxicity to birds and mammals. The risk to wild mammals and birds grazing on treated crops is low.</p>
<p>2. BEES</p>	<p>No risk management necessary and there is no requirement to avoid application of the product when bees maybe foraging on flowering weeds.</p>
<p>3. NON TARGET INSECTS AND OTHER ARTHROPODS</p>	<p>No risk management necessary Mirquat poses a low risk to a range of arthropod species commonly found in and around treated fields.</p>
<p>4. AQUATIC LIFE</p>	<p>Mirquat is <i>harmful to aquatic organisms</i></p> <p>Mirquat is of low toxicity to fish and algae and of moderate toxicity to daphnia and certain aquatic higher plants such as duckweeds (<i>Lemna</i>). <i>Do not contaminate surface waters or ditches with chemical or used container.</i></p> <p>No risk management necessary. When Mirquat is used according to the label instructions there will not be sufficient contamination of water to present a risk to aquatic life.</p> <p>Not categorised under the LERAP scheme.</p>

Environmental Information Sheet

Section	Profile
<p>5. SOIL and GROUNDWATER</p> <p>Earthworms</p> <p>Soil Micro-organisms</p>	<p>Mirquat is of moderate persistence in the soil. Chlormequat chloride can be considered moderately mobile and it is unlikely that the substance will reach anaerobic soil layers. Use of Mirquat in accordance with the label presents a low risk to groundwater, therefore no risk management is necessary.</p> <p>Mirquat is of moderate toxicity to earthworms. Mirquat is unlikely to have any significant effects on earthworm populations. No risk management is necessary.</p> <p>No risk management necessary. No effects on soil microbial processes were found so the risk is considered low.</p>
<p>6. NON-TARGET PLANTS</p>	<p>When used according the product label, Mirquat should have no adverse effects on non-target plants. However as Mirquat is a plant growth regulator, care should be taken to avoid spray drift into non-target areas when applying close to field boundaries.</p>

ALWAYS READ THE LABEL: USE PESTICIDES SAFELY

Care must be taken to minimise the risk of surface water contamination from farmyard and field sources.
